

## Roof Lifting Jakarta, Indonesia

### Facts

Highest roof truss:	50 m
Heaviest element:	160 to

### Handling equipment

Strand jacks H-40:	6 pcs
--------------------	-------

### Description

For the construction of a new theatre in Jakarta Hebetec Engineering Ltd. was asked to execute lifting works.

Two Main roof trusses were lifted in position, the heaviest one weighing 160 tons.

In a further stage eight steel supports for tribunes were lifted and assembled into final position using H-40 type strand jacks.
