

Roof lifting, Arena 92 in Paris La Défense, France

Description

The Arena 92 (U-Arena) is a modular built event centre, located at La Défense district in the centre of Paris. At Rugby configuration space for up to 30'000 spectators can be provided, at concert mode 40'000 spectators can be received, making this the largest indoor stadium in Europe.

After the inauguration by the Rolling Stones in October 2017, it will host the gymnastics events of the Olympic Games of Paris in 2024.

Hebetec realized the lifting of the 1'700 tons weighing and 7'000m² measuring steel roof assembled on the ground and raised in its final position some 40 meters higher.
