April 2018

Our activities

Lifting - Lowering - Moving - Support Heavy Loads

New Office Building at Herzogenaurach, Germany

The office building accommodates with its 50'000m² area modern workplaces for about 2000 employees. Well about 2m above ground, the 12'500t weighing steel structure was set up on 233 Hebetec «MegaTube» columns, on an area measuring about two soccer fields.

New coastal highway route, Reunion Island, France

On La Réunion Island a new coastal road proceeds between Saint Denis and La Possession for a distance of 12km. Part of this route required the construction of a 5'400m long concrete viaduct built on the ocean floor 10m below sea level.

Temporary Support of the Atlantic Bridge, Panama Canal

New larger vessels (New Panamax class) with dimensions of 366m x 49m x 57,9m navigating the Panama Canal required the construction of a new stay cable bridge which would also cope with the increasing local- and transit traffic.
